Canada Under Liberal Rule (2015–2025): A Decade of National Decline

Under the leadership of the Liberal Party from 2015 to 2025, Canada experienced radical shifts in governance, economics, and culture. While presented as progressive, inclusive, and sustainable, these policies led to widespread instability, economic fragility, cultural erosion, and a breakdown in national identity and sovereignty. This comprehensive report outlines the key failures and their long-term consequences.

I. ECONOMIC COLLAPSE AND FISCAL SABOTAGE

Monetary Expansion and Inflation: The M2 money supply surged to **$2.625 trillion CAD by 2024**, driven by unprecedented deficit spending and central bank intervention. Programs like CERB, CEWS, CRB, CRSB, and CRCB contributed to artificial economic dependence and labour market distortion.

Dependency and Wage Decay: These relief programs created a population reliant on federal assistance while wages stagnated. Inflation quickly outpaced earnings, leaving Canadians vulnerable to debt and unable to afford basic necessities.

Consumer Debt Crisis: With inflation rampant and housing, food, and energy prices rising, household debt reached record highs. Families borrowed to survive, not to build.

Punitive Taxation Regime: The Liberals imposed a luxury tax, digital services tax, and increased the carbon tax to **$95/tonne**. They also proposed a **66% capital gains tax hike**, withdrawn only under public and political pressure. These taxes punished productivity, investment, and entrepreneurship.

Decline in Business Investment: Anti-business rhetoric, ESG compliance mandates, and unstable fiscal policies drove capital out of Canada. Manufacturing and energy sectors were hit hardest.

Housing Market Breakdown: Mass immigration (over 1 million annually), foreign property purchases, and overregulation choked supply. Bureaucratic red tape and inflationary building costs crushed housing affordability, locking generations out of homeownership.

II. ENERGY DESTRUCTION AND ESG TYRANNY

Pipeline and Project Cancellations: Major infrastructure projects including Energy East, Northern Gateway, and Keystone XL were cancelled, eliminating jobs and energy independence.

Carbon Tax Pressure: While the consumer carbon tax was repealed in 2025, businesses still face escalating rates. These costs are passed on to consumers through higher prices on nearly all goods.

ESG and Net-Zero Mandates: Led by Mark Carney, ESG frameworks and Net-Zero policies restructured Canada’s financial and industrial landscape. Banks, investors, and regulators were forced to defund fossil fuels and redirect capital based on ideological scoring systems.

Energy Instability: Traditional energy sources were replaced with unreliable alternatives, undermining grid reliability, raising costs, and increasing dependency on foreign sources.

III. IMMIGRATION, NATIONAL SECURITY, AND LAW ENFORCEMENT FAILURE

Uncontrolled Immigration: Immigration levels exceeding one million annually overwhelmed housing, healthcare, transit, and school infrastructure. Screening procedures were weakened, allowing in individuals with **anti-Christian, antisemitic, and anti-Canadian ideologies**.

Cultural Tensions and Fragmentation: Pro-Hamas demonstrations and chants of "Death to Canada" and "Death to Jews" became common in major cities. Social cohesion fractured under competing cultural ideologies and government inaction.

Organized Crime Expansion: Chinese triads and Mexican cartels used Canadian casinos and real estate for money laundering. Canada emerged as a fentanyl source country, contributing to a North American opioid crisis.

RCMP Impotence: Legal requirements to disclose surveillance to suspects crippled law enforcement efforts. U.S. agencies scaled back cooperation, citing leaks, failed prosecutions, and political interference.

Political Complicity: Intelligence leaks suggest Liberal MPs and BC NDP MLAs were tied to money laundering operations. This direct or passive complicity is undermining public trust and institutional integrity.

IV. SOCIAL ENGINEERING AND SUPPRESSION OF FREEDOM

Legislative Control of Expression:

- **Bill C-16**: Codified gender ideology into law. Critics like Dr. Jordan Peterson warned of compelled speech and punishment for dissent.
- **Bill C-36**: Introduced vague definitions of online hate speech. Critics warned it allows state censorship based on subjective interpretation.
- **Bills C-11 & C-18**: Gave government influence over online content distribution, threatening press and media freedom.
- **Conversion Therapy Ban**: Criminalized Biblical counselling regarding sexuality and gender. Faith-based ministries became legal targets.

DEI and GBA+ Mandates: Equity initiatives like Gender-Based Analysis Plus and the Inclusion Charter became mandatory across institutions, enforcing ideological compliance and marginalizing traditional and Christian voices.

Faith and National Symbol Erosion: Church burnings, flag desecration, and public anti-Canada protests were ignored or defended by the government. Veterans and religious citizens felt abandoned.

Cancel Culture and Threats: Dissenters from ESG, DEI, and gender ideology were canceled, threatened, or silenced. Speaking Biblical truth became a public risk.

V. FOREIGN PRIORITY OVER NATIONAL INTEREST

Billions Abroad, Crises at Home:

- **$12.4B+ to Ukraine**, with another $4.5B pledged, other billions going to all sorts of foreign aid

— while Canadians face inflation and underfunded military/defense services.
- Canada failed to meet NATO spending targets.
- While domestic services declined, globalist ESG and UN-aligned mandates became policy priorities.

National Betrayal: Christian Canadians were demonized while foreign ideological actors were welcomed. Sovereignty was handed over to global institutions and foreign powers.

VI. MARK CARNEY: TECHNOCRACY OVER DEMOCRACY

Carney's Record:

- Former Bank of Canada and Bank of England Governor.
- UN Climate Finance Envoy.
- Architect of Net-Zero enforcement and ESG governance across the financial sector.

Imported Failures: Carney's policies collapsed sectors in the U.K. — energy instability, economic contraction, and mass layoffs. These same mandates are now being applied in Canada.

Agenda for Canada:

- Central banks tied to climate compliance.
- ESG scores for access to capital.
- Carbon-based digital ID systems.
- Financial punishment for dissenting industries (oil, gas, mining, forestry, agriculture).

Outcome if Elected:

- Capital flight.
- Skilled worker exodus.
- Rising inflation.
- Total control of speech, religion, and finance under regulatory governance.

VII. THE LIBERAL LEGACY: SYSTEMATIC NATIONAL DECLINE

- **Economy:** Inflated money supply, productivity taxes, and business strangulation.
- **Energy:** Canceled independence in favour of foreign dependence and unreliable renewables.
- **Housing:** Immigration and inflation killed affordability.
- **Security:** Organized crime and foreign intelligence emboldened under regulatory paralysis.
- **Faith and Freedom:** Biblical truth criminalized. Christians legally persecuted. Speech restricted.
- **National Identity:** Patriotism replaced with DEI indoctrination, flag desecration, and church arson.

VIII. THE CHOICE AHEAD

Canadians now face a decision: **restoration or irreversible decline**.

A vote for Liberal–Carney continuity is a vote for:

- ESG authoritarianism.
- Faith-based persecution.
- Regulated speech and media.
- Economic and energy dependency.
- Foreign-led governance.

This is not mismanagement. This is **systemic dismantling**.

The road to national renewal requires truth, courage, and a return to God-honouring principles.

Vote to restore Canada. Before it's too late.

IX. ANTICIPATING LIBERAL DENIALS – AND WHY YOU SHOULD FACT CHECK THEM

Some will try to dismiss this report as "conspiratorial" or "exaggerated." Before accepting that narrative, ask these questions:

1. Political Complicity in Crime
Liberals may claim there's no proof of cartel ties or foreign interference.

- Then why did the **Cullen Commission** confirm billions laundered through B.C. casinos?
- Why did CSIS leak reports about Chinese interference and funding of political campaigns?

2. Church Burnings and Flag Desecration
They may argue these were isolated incidents.

- Why were **dozens of churches burned** with no federal condemnation?
- Why is **flag burning defended** as expression, while public prayer is restricted?

3. Gender Laws and Religious Freedom
They'll say laws like Bill C-16 don't criminalize speech.

- Then why did professionals face **disciplinary action or job loss** for refusing pronouns?
- Why are pastors targeted for preaching **Biblical morality**?

4. ESG and Digital Control
They may claim ESG is just about ethical investing.

- Then why are **oil, gas, agriculture, and resource sectors losing funding**?
- Why is there talk of **personal carbon tracking** and **digital ID** tied to climate behavior?

5. Immigration and National Security
They'll say high immigration is needed for the economy.

- Then why are **housing, transit, and ERs collapsing under the load**?
- Why are **radicals allowed entry** while veterans are ignored?

6. Mark Carney's Globalist Agenda
They'll claim Carney is just a financial expert.

- Then why is he leading **UN and WEF-backed climate finance efforts**?
- Why did his **UK policies** result in energy collapse and job losses?

If the Liberals have nothing to hide — they should welcome scrutiny.

We encourage every reader to fact-check, verify, and investigate.

Because if even half of this is true — Canada is in crisis.

Search. Read. Pray. Then vote.

X. MARK CARNEY VS. PIERRE POILIEVRE: THE REAL STAKES FOR CANADA

Mark Carney: Canada's Unelected Globalist Puppet Master

Carney is not the saviour that state-funded media or Liberal insiders portray him to be. Often described as Trudeau 2.0, Carney has acted more like Trudeau's puppet master — the shadow Prime Minister, architect of economic decline, and Globalist-in-Chief.

Carney's Rise to Power

Carney's career has been dedicated to serving global financial elites. From 13 years at Goldman Sachs, to leading the Bank of Canada and Bank of England, his policies consistently benefited multinational investors. He left both roles early, often before scrutiny could catch up.

Afterward, he became a key figure in the WEF, UN climate programs, and ESG enforcement. As Vice Chairman at Brookfield Asset Management, he:

- Directed ESG investments and falsely claimed the firm's $600B portfolio was carbon neutral (later retracted).
- Moved Brookfield's HQ from Canada to the U.S.
- Continued investing in foreign fossil fuel pipelines while attacking Canadian energy.

GFANZ: Climate Cartel Exposed

In 2021, Carney founded the Glasgow Financial Alliance for Net Zero (GFANZ), a UN-backed group meant to enforce climate compliance in finance. But in 2024, the U.S. House Judiciary Committee accused GFANZ of:

- Colluding to force emissions cuts.
- Threatening companies with capital denial.
- Driving up prices in energy, agriculture, and transportation.

Major U.S. banks (Goldman Sachs, Citibank, Bank of America, Morgan Stanley, etc.) exited the alliance by late 2024. GFANZ collapsed. Carney resigned just before pressure peaked — a pattern seen throughout his career.

Rigged Political Entry

Carney was never elected, yet now leads the Liberal Party. His leadership race raised red flags:

- Contenders dropped out or were blocked.
- Voting irregularities were reported.

- Carney won nearly 90% — unheard of in Canadian party politics.

Suppression of Accountability

Journalists who challenged Carney were removed from events. Critics were met with disdain. Free speech took a backseat to controlled messaging.

ESG Hypocrisy and Worker Harm

Under Carney's ESG banner, Brookfield:

- Faced worker exploitation and anti-union accusations abroad.
- Used tax avoidance schemes.
- Advocated ethics while profiting from fossil fuel and foreign contracts.

Institutional Capture

Carney's reach extends through:

- The UN
- World Economic Forum
- Brookfield Asset Management
- GFANZ

His policies aim to shift economic and political power away from voters — and into the hands of bureaucrats and international elites.

Pierre Poilievre: Democratic, Transparent, Accountable

By contrast, Poilievre's rise was:

- Earned through elections, debates, and citizen support.
- Marked by consistent advocacy for freedom, lower taxes, and national sovereignty.
- Backed by legal action during the leadership race to expose misconduct (e.g., Patrick Brown case).

Poilievre's Track Record:

- Supported the Freedom Convoy against government overreach.
- Called out the Bank of Canada for inflationary policies.
- Opposed the carbon tax and central bank digital currency.
- Exposed ESG mandates as coercive, not voluntary.

Despite attacks, no ethical or financial wrongdoing has been found against him.

The Real Choice

Canadians must choose:

A globalist technocrat — unelected, insulated, and aligned with elite financial institutions.

Or a representative leader — elected by Canadians, speaking for Canadians, and accountable to Canadians.

One consolidates power in unelected institutions. The other restores it to the people.

The stakes could not be higher. The contrast could not be clearer.**
